the response of concrete under tensile loading is crucial for most applications because concrete is much weaker in tension than in compression understanding the response mechanisms of concrete under tensile conditions is therefore key to understanding and using concrete in structural applications understanding the tensile properties of concrete second edition summarises key recent research in this important subject area after an introduction to concrete the book is divided into two parts part one on static response and part two on dynamic response part one starts with a summary chapter on the most important parameters that affect the tensile response of concrete chapters show how multi scale modelling is used to relate concrete composition to tensile properties part two focuses on dynamic response and starts with an introduction to the different regimes of dynamic loading ranging from the low frequency loading by wind or earthquakes up to the extreme dynamic conditions due to explosions and ballistic impacts following chapters review dynamic testing techniques and devices that deal with the various regimes of dynamic loading later chapters highlight the dynamic

behaviour of concrete from different viewpoints and the book ends with a chapter on practical examples of how detailed knowledge on tensile properties is used by engineers in structural applications drawing on the work of some of the leading experts in the field the book is fully updated and will be a valuable reference for civil and structural engineers as well as those researching this important material presents recent research in the areas of understanding the response mechanisms of concrete under tensile conditions provides a summary of the most important parameters that affect the tensile response of concrete and shows how multi scale modeling is used to relate concrete composition to tensile properties highlights the dynamic behavior of concrete from different viewpoints and provides practical examples of how detailed knowledge on tensile properties is used by engineers in structural applications presents recent advancements in tensile strength determination under static and dynamic loading conditions for concrete structures covers hsfrc and frhsc presents new work on non local models and damage modeling the dynamic increase factor for tensile strength fracture energy and anchors and slop stabilization

the fourth european symposium on organic micropollutants in the aquatic environment was held in vienna austria from 22 to 24 october 1985 the symposium was organized within the framework of the concerted action cost 641 which is included in the third r d programme on the environment of the commission of the european communities the aim of the symposium was to review recent scientific and technical progress in the area of organic micropollutants in the aquatic environment and to present relevant research papers related to analytical methodologies transformation reactions and transport of organic micropollutants in water and water treatment processes a special session was devoted to theoretical aspects and future activities furthermore special poster sessions were organized where original contributions were presented this book presents the proceedings of the symposium including all review papers presentations of research papers and extended versions of all posters we believe that these proceedings provide a good overview of the activities in this field in europe we are confident that it will constitute a valuable contribution to the understanding and solution of the problems posed by organic micropollutants in the aquatic environment the commission of the european communities wishes to express its gratitude to the co organizers of the symposium bundesministerium fur gesundheit und umweltschutz wien and der osterreichische wasserwirtschaftsverband

mhpg basic mechanisms and psychopathology discusses the interactions between clinical biological psychiatry and basic neuropsychopharmacology composed of 10 chapters this book focuses on the role of 3 methoxy 4 hydroxyphenethyleneglycol mhpg in psychiatric disorders particularly in depression and mania the book first examines the enzyme systems that produce mhpg in the brain and the features of these enzymes that could be used to reconcile several contradictions with regard to the origin of urinary mhpg it then discusses the correlation between changes in impulse flow in central noradrenergic neurons of the locus ceruleus and mhpg levels in brain the subsequent chapters cover the theoretical issues and empirical data dealing with the interrelationships between plasma and urinary measures of mhpg and central nervous system noradrenergic function measurement methods of mhpg in plasma cerebrospinal fluid and urine are also presented the concluding chapters deal with the relevant human studies in patient and nonpatient populations concerning the role of mhpg in depressive disorders with particular emphasis on clinical studies in childhood and adolescence this book is of value to clinical biologists psychiatrists and neuropsychopharmacologists

green and intelligent technologies for sustainable and smart asphalt pavements contains 124 papers from 14 different countries which were presented at the 5th international symposium on frontiers of road and airport engineering ifrae 2021 delft the netherlands 12-14 july 2021. the contributions focus on research in the areas of circular sustainable and smart airport and highway pavement and collect the state of the art and state of practice areas of long life and circular materials for sustainable cost effective smart airport and highway pavement design and construction. the main areas covered by the book include green and sustainable pavement materials recycling technology warm cold mix asphalt materials functional pavement design self healing pavement materials eco efficiency pavement materials pavement preservation maintenance and rehabilitation smart pavement materials and structures safety technology for smart roads pavement monitoring and big data analysis role of transportation engineering in future pavements green and intelligent technologies for sustainable and smart asphalt pavements aims at researchers practitioners and administrators interested in new materials and innovative technologies for achieving sustainable and renewable pavement materials and design methods and for those involved or working in the broader field of pavement engineering.
